

Vaccine Preventable Diseases:

Facts of Vaccine Science, Safety, and Surveillance

Target Audience

- Physicians/Nurses in Pediatrics and Family Practice
- School Nurses
- Public Health Officers
- Infection Control Practitioners
- Public Health Nurses
- Epidemiologists
- Health Educators
- Advanced Practice Nurses

Objectives

At the end of the conference participants will be able to:

- Identify parental concerns for which providers should be actively listening and be prepared to address.
- Describe communication techniques to optimize parental vaccine acceptance.
- Identify barriers (national/New Jersey) to vaccine financing from both provider and consumer (parent/patient) perspectives.
- Describe the purposes, benefits and barriers to using immunization registries from national and New Jersey perspectives.
- Describe how the annual flu strains are selected and the vaccines are developed; and the lessons learned following a year's experience with novel H1N1 vaccines and disease, including communication difficulties when two types of influenza vaccines are offered almost simultaneously.
- Describe research findings; state and local efforts with distribution and administration; and impacts and acceptance by providers; consumers; and schools.
